SEO audit report

nonamedevs

SITE	DATE	SCOPE	PREPARED BY
nonamedevs.com	November 28, 2026	1 page, 16 checks	Arham Nishat

0	1	15
blocking problems	point to improve	checks in order

1. Summary

What to remember if you read only one page.

No blocking problem: the page responds, can be indexed and displays on mobile. The point to improve concerns the meta description. The fix takes less than an hour.

PRIORITY	
	Rewrite the meta description of /.

2. Findings ranked by priority

Problems first, then points to improve. One line per finding.

FINDING	PAGE	FIX	EFFORT	IMPACT
Meta description of about 971 px (152 characters): it will be cut past 920 px. “Secure websites and systems for industrial and new businesses. Nonamedevs builds fast, SEO ready websites you own. Start your project or launch with us.”	/	Tighten it so the important information fits before the cut.	S	Medium Without it, Google picks its own snippet

Effort: S under an hour, M a few hours, L more than a day. Impact is estimated from the type of check.

What is already in order

15 checks out of 16, grouped by theme.

Access	HTTPS, HTTP status, and redirects.
Indexing	Indexing allowed, canonical, and declared language.
Google result	Title.
Structure	H1 heading, heading order, content volume, and internal links.
Mobile and images	Mobile viewport and alt attributes.
Sharing	Open Graph and structured data.

3. Action plan

Each line says what to do and how to check it is done.

WHEN	ACTION	HOW WE WILL KNOW
This week	Rewrite the meta description of /	The line is in order in the next report
In 4 weeks	Compare the clicks of these pages in Search Console	Click-through rate before and after the fixes

4. What this report does not cover

It reads the HTML of each page like a crawler. So it does not see:

- content built with JavaScript in the browser
- links from other sites to yours
- pages you did not list
- real loading speed
- rankings and clicks in Google
- what AI assistants say about your brand

The whole site, every week,
and the fixes made for you.

Bloomwise audits all your pages, reads your Google data and applies the fixes once you say yes. 14-day free trial, no card required.
